

How to Build A Workout

#1

Warm-up with an exercise that gets your heart pumping faster like a light jog or a fast walk.

#2

Pick an Aerobic workout such as a fast walk or run on the treadmill or outside, ride your bike, rollerblade, etc. for about 30 minutes.

#3

Next, pick out an exercise that builds strength and tones your muscles such as push-ups, crunches, squats, stairs or weights. You may combine these exercises or do more than one.

#4

Cool down with stretching or yoga poses.

EXAMPLE:

Aerobic:

- Jump rope
- Ball Sports
- Fast walk
- Jumping jacks
- DDR
- Swimming
- Bike
- Play outside

Strength:

- Push-ups
- Crunches
- squats/stairs
- Weights
- Stability ball
- Thera-band

Stretch :

- Upper Body
- Lower Body
- Yoga

The Weekend

Stay active during the weekend with fun activities like Walking at the mall with some friends, going bowling or mini-golfing, heading to the pool or taking a yoga class. Keeping active on the weekends is just as important being active during the week. Your brain may get two days off, but your body is still on the clock!
